

Water Sprinkler Bids:

Both brands of sprinklers are very similar in size and cost. I highly recommend going with the Micro Rain from Froese Irrigation for these reasons:

The Micro Rain sprinkler has 43' more hose

The Micro Rain has 44 moving parts compared to 139 moving parts

The Micro Rain is \$839 more but has complete setup and delivery to Fowler

The Micro Rain technology is leading the industry now

Froese Irrigation has been serving Fowler for many years

Both bids are only good till 01/01/12, in fact orders for these prices will have to be made mid Dec. as the plants are closed for Christmas and orders after that will be on the new price schedule.
